

Sealed tea sachet wallet

Print at actual size / 100%. Cut solid lines; crease dashed lines. Trace onto chosen paper; internal labels are assembly guides. Decorative packaging, not a food pouch.

Measure this line: 1 inch / 25.4 mm

Blank: $5 \frac{3}{4} \times 4 \frac{1}{4}$ in. Proposed sealed packet maximum: $2 \frac{1}{2} \times 3 \frac{3}{4} \times \frac{1}{8}$ in. Fold like a book around the spine; keep the wrapper intact. Secure with a removable ribbon.

Make one sample with actual paper and packet. Check panel bowing, seal clearance, removal and slipping. Digital geometry is checked; physical fit has not been tested.

Loose cloth napkin band

Landscape page; print at actual size. Trace onto chosen paper; internal labels are assembly guides. Join at the 1/2-inch tab; never put adhesive on cloth.

9 1/2 x 1 1/2 in strip

Join last 1/2 in over the other end: 9-in loop

Measure this line: 1 inch / 25.4 mm

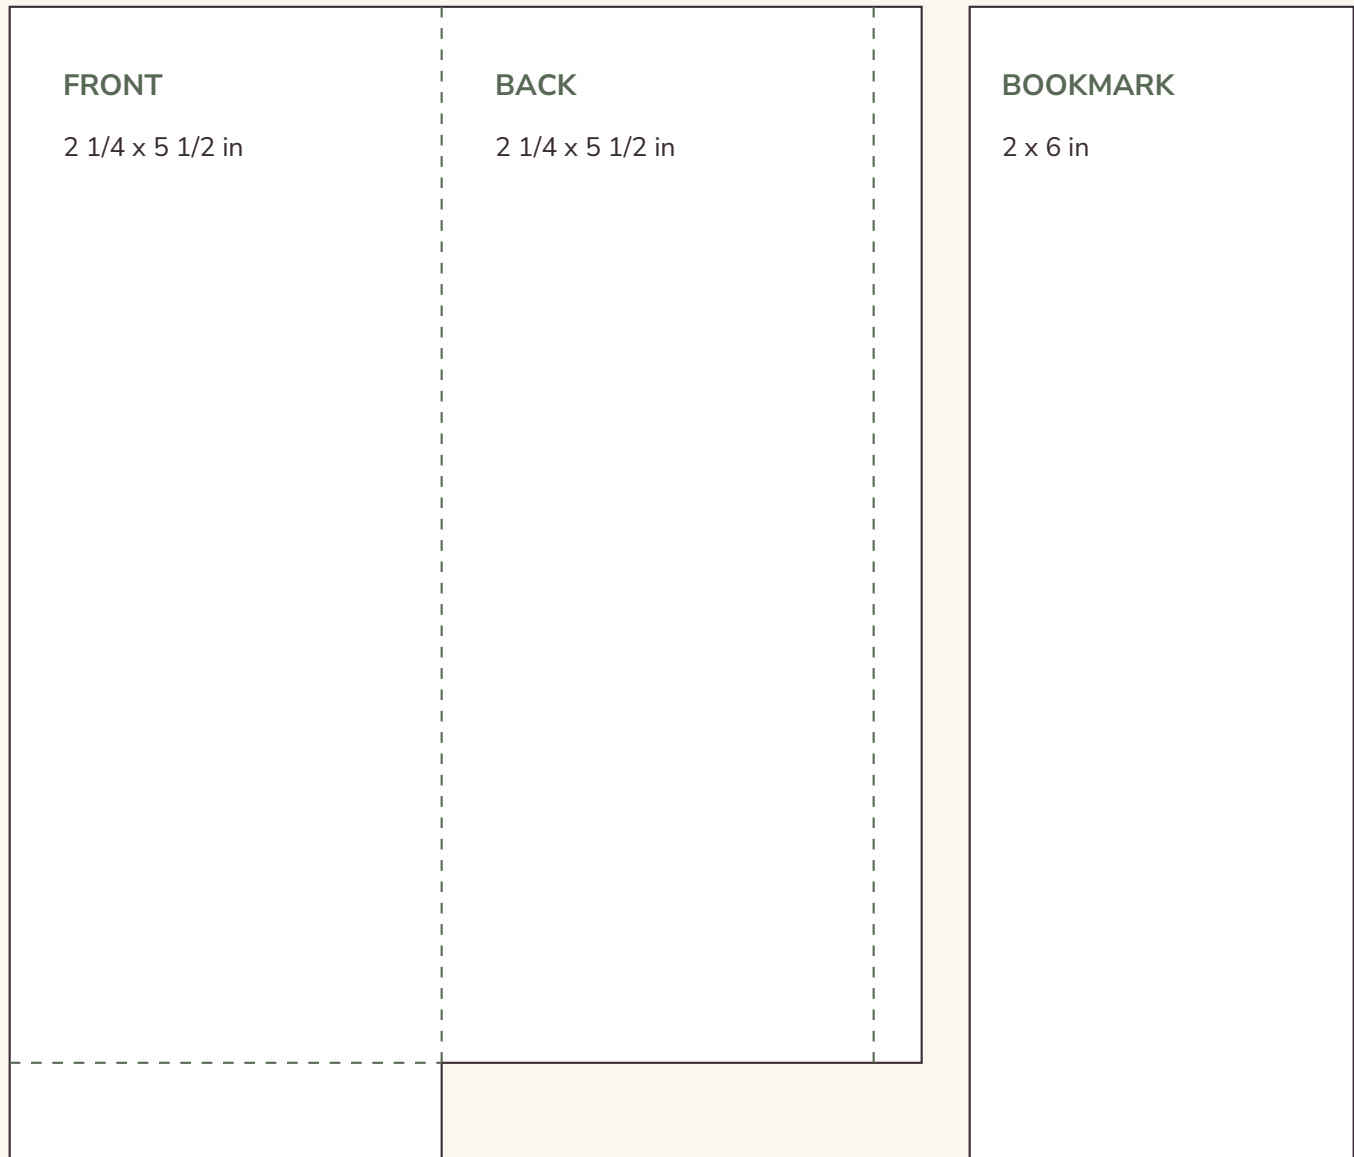

Standard pattern: actual rolled bundle circumference at most 8 1/2 in, plus a proposed 1/2-in ease allowance. Check that the finished band slides off without squeezing or snagging.

Measured bundle circumference / adjusted strip length:

For a different size: strip length = measured circumference + proposed 1/2-in ease + 1/2-in overlap. Fit one sample and adjust the ease for the actual cloth.

Bookmark and open-top sleeve

Trace onto chosen paper; internal labels are assembly guides. Solid lines: cut; dashed lines: fold. Glue tabs outside. The 6-inch bookmark protrudes 1/2 inch from the pocket.

Measure this line: 1 inch / 25.4 mm

Fold front over back. Wrap and glue the 1/4-in side tab onto the front outside; then wrap the 1/2-in front bottom flap onto the back outside. Dry, then check free insertion and removal.

Sample-fit and batch record

Test one complete assembly before purchasing or cutting a batch. Keep an approved sample beside the work area.

Chosen project / actual item and manufacturer information:

Paper / adhesive / ribbon used for the sample:

Printed calibration line measured exactly 1 in / 25.4 mm:

Actual item measurements / pattern adjustment needed:

Sample check	Result / change needed
Cut and fold marks align	
Item fits without seal bending or cloth compression	
Item can be removed without tearing or snagging	
Dry seams stay closed during expected handling	
Required ingredient or care information stays with item	

Batch stage	Owner	Usable completed count
Cut		
Crease		
Assemble / dry		
Final fit and information check		
Pack / transport / distribute		

Personal, noncommercial use. These are original digital patterns with verified dimensions, not physically tested packaging. Count finished usable favors, not blank pieces.
