

Two jugs on a console

Proposed footprints. Measure handles, spigots, support, tray interiors and real glass clearance.

72 x 20 in surface

Zone	Outside footprint	Back-left coordinate
1. Clean cups	14 x 14 in	x 2, y 3 in
2. Jug 1	12 x 14 in	x 20, y 3 in
3. Jug 2	12 x 14 in	x 36, y 3 in
4. Garnish	16 x 14 in	x 52, y 3 in

Console 72 x 20 in. Each jug footprint is up to 8 x 8 in, including handle. Outside trays: 14 x 14, 12 x 14, 12 x 14 and 16 x 14 in. Proposed 4-in gaps. Guests use the front and move left to right.

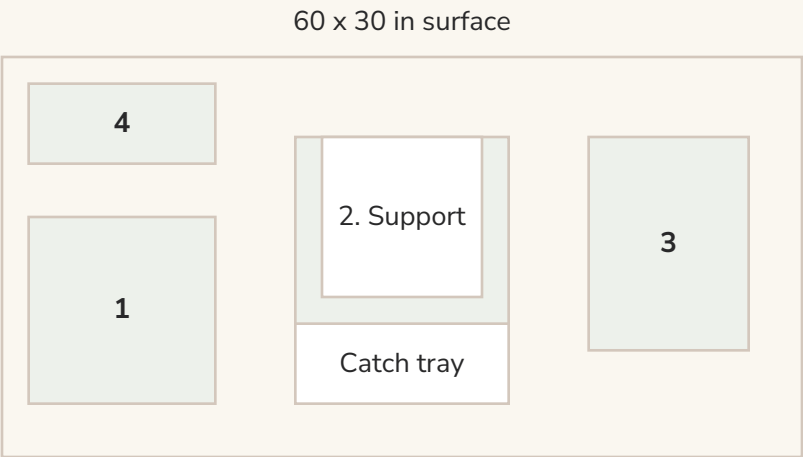

Actual surface / load support / empty equipment fit checked:

Guest and host approaches tried by:

Original planning worksheet. Assumptions and written steps:

One dispenser and a refill side

Proposed footprints. Measure handles, spigots, support, tray interiors and real glass clearance.

Zone	Outside footprint	Back-left coordinate
1. Clean cups	14 x 14 in	x 2, y 12 in
2. Pour zone	16 x 20 in	x 22, y 6 in
3. Host refill	12 x 16 in	x 44, y 6 in
4. Dry extras	14 x 6 in	x 2, y 2 in

Table 60 x 30 in. Inside zone 2: support 12 x 12 in at x 24, y 6; catch tray 16 x 6 in at x 22, y 20. A 2-in gap separates them. The actual spigot must reach the tray without support overhang. Host approaches from the right.

Refill, spills and cup returns

Used glasses go on another stable surface; clean cups and refill bottles stay separate.

Primary host: _____ Backup: _____

Plain water location / drink and ingredient labels:

Refill supply / product storage instructions / who checks them:

Return-tray location (proposed 18 x 14 in) / clearing owner:

Spill cloth location / temporary service-stop signal:

Container replacement or refill steps:

Time	Container / action	Host / check

Use a stable compatible stand. Ice purchase calculation has its own owner. Full guide:
